Subject: EW FS Topics for further discussion

Dan See below for some of the more major changes EPA will be requiring at part of the Approval with Modifications on the EW FS. Let me know if you want to chat about anything further this week before our meeting next week.

- Remove references to SCUM II information, includes all Ecology natural background and PQL values. SCUM II is not an ARAR and shouldn't be referenced in the FS. When it was appropriate to mention SCUM II, there are revisions to clarify that it is not an ARAR.
- Remove Appendix A, Part 1. To implement removal of the SCUM II references (i.e. Ecology natural background values), significant revisions would be needed for Appendix A. Since compliance with SMS is sufficiently described in Section 9.1.1.2 of the FS, Appendix A Part 1 is not needed. References to Appendix A Part 1 in the main FS text have also been removed or modified.
- Recalculate risks for cPAHs based on the revised benzo[a]pyrene toxicity values.
- Revisions to the ARARs table as directed by EPA council. Several of the citations are incorrect.
- Other clarification revisions.
